EXPERIENCE

Emirates NBD, Dubai—*Software Consultant*

May 2025 - PRESENT

- ENBD X, Insurance
 - **Stack:** Nodejs, Typescript, Expressjs, MongoDB.
 - Worked on product that allows end users to buy insurance using a mobile app.
 - Responsible for delivering REST APIs, that are consumed by mobile team.
- Wealth Connect Corporate Actions
 - **Stack:** Nodejs, Typescript, Reactjs, MongoDB
 - A web application for wealth advisors to handle their clients. Different features sending bulk notifications, consents.
 - Currently building this app from scratch, heavily using github copilot agentic mode for development.

Emerson Automation Solutions, Pune—*Senior Software Engineer*

APRIL 2022 – April 2025

- ValveLink Pro
 - **Stack:** ReactJS, Redux, Redux-sagas, Websockets (react-use-websocket), Nodejs, Express.
 - Working on a product called Valve Link Pro.
 - Current role is more of a Frontend where we consume APIs to communicate with live devices.
- RTM (Tank Monitoring)
 - **Stack:** Nodejs, GraphQL, Nextjs/Reactjs, MSSQL
 - A multi-tenant system for real time tank monitoring.
 - My role here was to review and improve backend architecture for this multi-tenant system.

Spak Engineering, Bangalore—*Full Stack Developer*

JUNE 2020 - MARCH 2022

- Telemed
 - **Stack:** React, NodeJS, Express, MSSQL, MongoDB, Websockets (socket.io-client).
 - Worked on a web application which manages the ecosystem for Doctors, Patients, Nurses and Treatments with the help of recording devices (Video/Audio). (For Example for disease like Parkinsons)
 - Made use of websockets for real time data like live chat and HLS video streaming.
 - My role here was to design and develop features as per Product Owner Requirements.
- RE: Instrument Monitoring System
 - **Stack:** React, NodeJS, MSSQL, MongoDB.
 - Successfully delivered a tool which is built using Electron (React/redux/sagas, Nodejs, MongoDB, MSSQL).
 - Hosting: AWS EC2, S3 for storage, DynamoDB.

- My role here was to design, architect and develop a hybrid app using electron and backend using Node.js and Express.js

Firstcry.com, Pune — Full Stack Developer

NOV 2017 - JUNE 2020

- B2B Application
 - **Stack:** AngularJS 1.5, Angular 6, NodeJS (Restify), PostgreSQL, MYSQL, MSSQL.
 - Working on a Business to Business (B2B) Project.
 - Working on some major business driving features.
 - Hosting: AWS EC2, S3 for storage, ElasticSearch, AWS lambda
 - This App was used by Frenchies to order product in bulk
 - Auto Replenishment System was a feature which helped Franchise owners to order fast selling products in their region.
 - My role here was to design and develop features for frontend and backend as per Merchandising Team and Business analysts.
- Feedback Kiosk
 - **Stack:** Nodejs, Arduino.
 - **Hardware:** ESP32/ESP WIFI
 - Successfully delivered a tool which ran as a windows service on POS machines which recorded customer feedback via a Kiosk like touch panel device.
 - My role here designed and developed a windows service using Node.js for this plug and play device.

Allure INC, Pune — Magento Developer

JULY 2017 - OCT 2017

- PHP Magento, MYSQL, JavaScript, JQuery.
- Worked on Ecommerce website.
- Worked directly with Client.
- My role here was to develop features as per client needs.

EDUCATION

Shivaji University, Kolhapur — Bachelor of Engineering (Computer Science)

2014 - 2017

JJ Magdum Polytechnic, Jaysingpur — Diploma (Computer Science)

2011 - 2014
